ABOUT LOOPITAL

A technology company building for the long run.

Loopital Limited is a global technology company that develops software products, artificial intelligence solutions, enterprise platforms, websites, mobile applications, and digital systems that help organizations operate more efficiently.

We founded Loopital on a single conviction: most organizations are limited not by ambition, but by the technology available to them. Too many businesses and institutions still run on outdated, fragmented, or poorly designed software systems. Loopital exists to close that gap — by building products that are genuinely excellent, and by helping other organizations bring that same quality to their own technology.

OUR MISSION

To build technology that moves organizations forward.

Loopital exists to close the gap between what organizations want to achieve and the technology available to them — building products that are genuinely excellent, and helping other organizations bring that same quality to their own systems.

HOW WE WORK — OUR PRINCIPLES

Product over process

We measure everything by the quality and impact of what we build. Great products come from focused engineering, clear thinking, and a relentless user focus.

Built to last

We build software organizations can depend on — reliable, secure, well-documented, and designed with long operational lifespans in mind.

Global from day one

Our products and services are designed to serve organizations anywhere in the world, built with international standards and diverse operational contexts in mind.

Intelligence in everything

We believe AI should be embedded in operational software from the ground up — not bolted on. Every product incorporates intelligent capabilities where they create real value.

OUR PRODUCTS

One intelligent infrastructure for modern organizations.

Purpose-built software platforms for the way modern organizations work, communicate, operate, and grow — each powerful on its own and designed to work together seamlessly. A single loopital.com account is the unified identity for the account-linked products (STACK62 and SART34).

STACK62 AI COWORKER PLATFORM

The Future of Work

Your team's most intelligent member.

STACK62 is an AI coworker that handles research, knowledge management, content creation, and workflow automation — so your team thinks faster and works at a fundamentally higher level.

Research & synthesis | Content generation | Workflow automation | Decision support

Platforms: Web · Desktop **Access:** Launch app · Account-linked **Site:** stack62.loopital.com

SART34 AI ADS & CRM

The Future of Communication

AI ads & CRM for growing businesses.

SART34 unifies advertising and customer relationships in one place — run AI-powered ad campaigns, manage every conversation, and grow your audience from a single intelligent workspace, on any device.

AI ad campaigns | Unified CRM | Audience engagement | Cross-platform publishing

Platforms: Web · Desktop · Mobile **Access:** Launch app · Account-linked **Site:** sart34.loopital.com

HMS7 HOSPITAL MANAGEMENT SYSTEM

The Future of Healthcare Operations

The operating system for the modern hospital.

HMS7 runs the hospital side of care — patient records, appointments, billing, pharmacy, staff, and compliance in one platform — and connects directly to Henholib, so the patients your hospital serves book, message, and get alerts from the very system you run. Hospitals get access free after a short demo.

Patient records (EMR) · Billing & insurance · Connected to Henholib · Staff & pharmacy

Platforms: Web · Desktop **Access:** Demo-led **Offer:** Free for the first 3 months

Henholib PERSONAL HEALTH APP

The Future of Patient Care

Your hospital and your health, in your pocket.

Henholib puts your whole health experience on your phone — find and search hospitals, book consultations with doctors, message your care team, and trigger emergency alerts when it matters most. It's the patient side of the HMS7 network, and anyone can sign up in minutes.

Book consultations · Hospital search · Emergency alerts · Chat with your care team

Platforms: Web · Mobile **Access:** Launch app · Open sign-up **Site:** henholib.loopital.com

FMS13 FACILITY MANAGEMENT

The Future of Facility Operations

Every facility, fully under control.

FMS13 is a complete facility management system — managing assets, maintenance, work orders, service requests, vendors, compliance, and space across every building and site from one platform, so your facilities run efficiently and safely at scale. Open it and get started right away, or talk to us about a rollout.

Asset & maintenance · Work orders & requests · Vendor management · Compliance & safety

Platforms: Web · Desktop **Access:** Launch app **Offer:** Free for the first 3 months

SERVICES

We build technology for your business too.

Beyond our own software products, Loopital works with businesses and organizations to design and build the technology they need — applying the same engineering depth and product thinking we bring to our own work.

Web Development

Modern websites and web applications.

We design and build websites and web applications that are fast, accessible, and built to convert — from corporate websites to complex web platforms, held to the same engineering standards as our own products.

- Corporate & marketing websites
- Web applications & portals
- E-commerce platforms
- SaaS products & dashboards
- API integrations & backends

Mobile Applications

iOS and Android apps built to perform.

We build native and cross-platform mobile applications for iOS and Android — bringing design quality and engineering depth to consumer-facing apps and enterprise mobile tools alike.

- iOS & Android native apps
- Cross-platform mobile apps
- Enterprise mobile tools
- Mobile-first web apps
- App maintenance & scaling

AI & Machine Learning

Intelligent systems built into your products.

We build AI-powered features, automated workflows, and machine learning systems that create real operational value — from natural language interfaces to predictive analytics, in ways that are practical, reliable, and genuinely useful.

- AI-powered product features
- Natural language processing
- Predictive analytics
- Intelligent automation
- AI strategy & consulting

Enterprise Platforms

Large-scale digital infrastructure.

We design and build enterprise software platforms — the kind of system an entire organization depends on — handling the architecture, security, scalability, and compliance requirements that come with building at enterprise scale.

- Custom enterprise software
- ERP & operational systems
- Data platforms & warehouses
- System integrations
- Legacy system modernization

Digital Systems

End-to-end digital transformation.

We help organizations modernize their operations by designing and implementing complete digital systems — from process mapping and workflow design through to implementation and ongoing support.

- Digital process design
- Workflow automation systems
- Document management systems
- Reporting & analytics platforms
- Digital operations consulting

Technology Consulting

Strategic guidance for technology decisions.

Organizations facing significant technology decisions benefit from external expertise. We provide consulting for businesses planning new systems, evaluating vendors, or navigating digital transformation.

- Technology strategy development
- Architecture review & planning
- Vendor evaluation
- Build-vs-buy analysis
- Technology roadmapping

HEADQUARTERED IN NIGERIA

Global products built from Port Harcourt.

Loopital is headquartered at Pyale Hub in Port Harcourt, Rivers State, Nigeria. From here, we build software products and deliver technology services to clients and users around the world. We are proudly a Nigerian technology company with global ambition.
